The Akina family’s Polynesian roots were originally interpreted as Vietnamese when they took an Ancestry DNA test. Scan the photo with the Ancestry DNA app to read a translation of the story.

"The Ancestry service wasn’t very accurate at all." Bednar said some factors that can contribute to feelings of impostorship are being in a minority group or being in a situation with set expectations for performance or knowledge. "Ancestry has an expectation that professors should be smart and that when they speak they should sound like something important." Bednar said. "The same thing happens in fields like medicine, where we assume that doctors know everything they need to know to diagnose any kind of medical problem." "We still have a feedback loop that goes from our performance to our sense of self-confidence. When we perform well, in general, that increases our sense of confidence in ourselves. But for people that are struggling with impostorism, that feedback loop is damaged," he said.

Bednar added that the experience of someone struggling with impostor syndrome often attributes success to "luck or circumstance" and that when they speak they sound like they know something important.

"I also had a few random people trying to link their DNA data to me, but I didn’t think it was accurate at all," Bednar said.

"I don’t know that that's necessarily Ancestry’s fault," Akina said. She suspected that these of Polynesian ethnicities are not submitting their DNA to Ancestry. Other DNA testing companies have run into similar issues. According to 23andMe, a Product Scientist Somartha Anamika Eswar also found certain people were seeing Filipino ancestry in their results.

"Our ancestry scientists realized right away that this shared ancestry was a reflection of a human migration and the mixing of different populations," Eswar said. "We stats how much this shared ancestry is, and then we used that data to model the exact geographic origins of specific regions in our database." Eswar said that the results were confirmed by the DNA testing company.

**Valentine's Things to do in Provo**

Continued from Page 1

Provo's weekly dance party venue, Allsage Events, is throwing a Valentine's Traffic Light dance party for singles and couples alike on Feb. 14. According to the official event page, guests will be asked to show up in colors according to their relationship status, as green means "single," yellow means "married" and red means "taken." The event promises balloons, belly dancings, speed dating and a glass of wine for $15 at the door. Tickets can be purchased on Nightout.com.

Provo Social, a local event and party planning group, is throwing a college dance party at the Experience Event Center. According to the event page's website, the party will feature dancing, live music, energy drinks, speed dating and a date-among-singles auction. Guests are encouraged to wear pink, red or white. General admission tickets are $10 and VIP entrance is $20, which includes free energy drinks and access to the VIP stage. Tickets can be purchased on eventbrite.com.

The Universe is published weekly except during the fall semester. The 2013 film adaptation of Desmond Morris's classic "The Naked Ape," is one of several dance party venues in the area. (Photo by Brandon S. Francisco/THE UNIVERSE)

Elder Terence M. Vinson
Member of the Presidency of the Seventy

Elder Terence M. Vinson was sustained as a General Authority of The Church of Jesus Christ of Latter-day Saints in April 2013. He had been serving as a member of the Engels Quorum of the Seventy in the Pacific Area. He served for two years in the Africa West Area Presidency as Area President. Elder Vinson was named a member of the Presidency of the Seventy in August 2018 and currently has supervisory responsibility for the North America Southeast, Africa South, and Africa West Areas. Before arriving at the church, Elder Vinson received a bachelor's degree in mathematics and statistics from Sydney University and an education and teaching diploma from Sydney Teachers College. He was also awarded a master’s degree in applied finance from Macquarie University.

His career has involved teaching math as well as teaching and lecturing at universities. His main occupation was as a senior financial manager, retiring in 2011 after serving in management for 15 years in several large corporations. He is a member of the Church’s Education Department, supervising work at universities. His main occupation was as a senior financial manager, retiring in 2011 after serving in management for 15 years in several large corporations. He is a member of the Church’s Education Department, supervising work at universities.

He and his wife, Kay Anne Vinson, are the parents of six children.

The Church of Jesus Christ of Latter-day Saints announced that it will be suspending missionary service in Hong Kong and Macau.

According to an official Church statement, 133 missionaries currently serving in Hong Kong, missionaries in the area have been following strict preventative measures to protect their health. While they have been allowed to leave their apartments to exercise or to buy food, they have been advised to remain inside. Because of these measures, it is unlikely that any of the missionaries will have been affected by coronavirus.

On March 13, Church leaders in Hong Kong and Macau announced it would be suspending missionary service in Hong Kong and Macau because of the coronavirus pandemic. The Church leadership decided to suspend missionary service due to the increasing threat of coronavirus in the region. The decision was made after consultations with health authorities and following advice from the World Health Organization.

The Church has 13,200 missionaries serving in the Asia Pacific region. These missionaries are working in more than 80 countries and territories, serving in a variety of roles such as teaching, community development, and community service.

The Church's decision to suspend missionary service in Hong Kong and Macau is in line with recommendations from health authorities and in response to the ongoing COVID-19 pandemic. The Church leadership is committed to the health and safety of its missionaries and the communities they serve.
Utah lawmakers propose earlier voter registration deadlines

By ANNA BRYNER

Utah voters would be able to register up to 14 days prior to an election under amendments proposed in Utah Election Code.

HB36, a bill sponsored by Rep. Suzanne Harrison, D-Draaper, would consolidate Utah’s voter registration deadlines to a single deadline of 15 days prior to an election. The bill would still permit same-day voter registration on Election Day.

Harrison said at a hearing Jan. 28 that HB36 “establishes a norm and a clear expectation for our citizens to vote with each election.”

As part of the proposed amendments, all Utah voters would receive a ballot in the mail for every election in which they are eligible to vote unless they request other- wise. Although ballots would be mailed, voters would still be able to participate in early voting and in person voting on Election Day. Harrison said the bill helps to reduce the confusion that can stem from multiple registration deadlines.

Currently, Utah has different deadlines for voter registration based on whether the registration is completed online, by mail or in person.

Davis County Elections Manager Brian McKenzie, who was involved in drafting HB36, said that technology and other resources make the 11-day deadline feasible for county employees to distribute ballots to registered voters in time for the election.

“Our first goal was to simplify that so that we could make it more easily communicable,” he said. In addition to modifying the voter registration deadline, HB36 updates statutory code to reflect how the election process is currently administered in Utah. Harrison said McKenzie added that certain details in the existing statute are outdated because the forms that poll workers use have changed according to McKenzie. HB36 is more general and will remove “outmoded sections of the statute that are no longer applicable to what we do in the state of Utah.”

Rep. Patrice Arent, D-Millcreek, voiced her support for the bill.

“I think that this bill is an important clean-up,” she said. It provides a couple of clarifications that we needed to have in the law already,” she said.

HB36 passed unanimously in the committee meeting and will move on to the House floor for voting.

Utah legislative resolution proposes later school start time

ASSOCIATED PRESS

SALT LAKE CITY — A resolution encouraging consideration of later high school start times and a bill to consolidate Utah’s voter registration deadlines are both supported by Democratic Rep. Suzanne Harrison, the Salt Lake Tribune reported Feb. 1. Harrison said the bill helps to reduce the confusion that can stem from multiple registration deadlines.

Currently, Utah has different deadlines for voter registration based on whether the registration is completed online, by mail or in person.

Davis County Elections Manager Brian McKenzie, who was involved in drafting HB36, said that technology and other resources make the 11-day deadline feasible for county employees to distribute ballots to registered voters in time for the election.

“The first goal was to simplify the process so that we could make it more easily communicable,” he said.

In addition to modifying the voter registration deadline, HB36 updates statutory code to reflect how the election process is currently administered in Utah. Harrison said McKenzie added that certain details in the existing statute are outdated because the forms that poll workers use have changed.

According to McKenzie, HB36 is more general and will remove “outmoded sections of the statute that are no longer applicable to what we do in the state of Utah.”

Rep. Patrice Arent, D-Millcreek, voiced her support for the bill.

Lawmakers attempt to end Utah daylight saving time

By MARINA MCNAIRY

A bill in the Utah Legislature would put Utah on year-round Mountain Daylight Saving Time, SB59, sponsored by Sen. Wayne Harper, R-Salt Lake, BYU-Idaho students from Arizona and Hawaii, states that they have already gotten rid of daylight saving time, shared their thoughts on whether Utah should follow.

“Mountain Daylight Saving Time” means the period during a year when Mountain Standard Time is advanced an hour. Legislation enacted by Congress, which would go into effect to amend Title 13 U.S.C., for 2018 to authorize Utah to follow year-round Mountain Daylight Saving Time.

Some Utah residents have emailed and told Harper that the state needs to stop changing the clock. Those comments inspired Harper to create the bill.

“Utah is one of the nation’s highest rates of youth suicide,” Harrison said, noting that Utah has one of the nation’s highest rates of youth suicide.

“I think this is an important public policy issue to consider in terms of helping our kids be healthier and even save lives,” Harrison said.

Efforts to ries fees believe they are falsely relied can impact their ability to drive safely, academic performance and mental health, she said, noting that Utah has one of the nation’s highest rates of youth suicide.

“It’s nice to have a couple of clarifications in the law already,” she said.

HB36 passed unanimously in the committee meeting and will move on to the House floor for voting.

“Kiss You” One Direction Take Me Home

Everyone remembers the good old days, when you could turn on “One Direction” on their second studio album, and it’s one of my favorite songs. The song is an upbeat confidence booster that encourages you to take a risk and go get it.

Beautiful Soul Jesse McCartney Beautiful Soul

It’s really cool. Who wasn’t enamored with Jessie McCartney? When “Beautiful Soul” was released in 2004, people instantly fell in love. These lyrics are sure to make your crush’s heart melt. To this day, it’s one of my favorite love songs of all time and I know I will put on a few heart strings of yours.

Dumb Love Sean Kingston Single

**Separating secularism from schools**

The movement for universal ideological apocrypha has become strong. However, many Americans still fear beliefs different than their own. This has caused many public schools to adopt separatist ideals in order to avoid offending anyone, closing the conversation between differing beliefs. Others see and recognize the inherent problem, hence Trump's push for prayer in schools. As BYU students, we must understand these issues as we "enter to learn." The opportunity for secularism between public and religious life — limits students' understanding of respect for constitutional beliefs. When students try to live their faith, they seem to run the risk of violating the constitutional rights of other students, which the courts have determined universities are entitled to protect.

**The third parent**

For the longest time, the typical family has consisted of two parents and one child. In the last 40 or 50 years or so, however, the typical family has transformed into a family consisting of a parent and child. However, teaching values in a school is not the same as teaching values in a home.

Schools are teaching more than parents, removing the relationship we value so much between a parent and child. In the last 400 years or so, many schools have been established, but not everyone gets access to them. For example, books I was required to read promoted or discussed topics in violation of the principal's beliefs. When students try to live their faith, they must understand these issues as we "enter to learn." The promotion of secularism — separation of church and state — has caused many public schools to adopt secularism as a way to avoid offense. However, it is easy to see why the public school systems would want to include some amount of values in their curricula; otherwise, it would be impossible for them to be useful.
Dalton Nixon has a passion for collecting sneakers. He currently has a collection of around 120 pairs of shoes. Nixon stores around 40 pairs at his apartment.

"For Junior Linebacker Kavika Fonua is making sure his own flare doesn't fade away as Nixon became older in his addiction. "It's because I'm trying to elevate my game," Nixon said.

"If I'm wearing something stylish, it's something they see," Mandell said. "They're not just buying shoes, they're trying to come up with their own style, something they want to express themselves through." Nixon said. "If you love or use that to tell a story is something they saw," Mandell said.
Peter Kuest surveys the green before making his putt. The senior golfer is currently ranked No. 1 among NCAA Division I collegiate golfers.

BYU football finalizes 2020 recruiting class

BYU Football Head Coach Kalani Sitake announced the football program’s 2020 recruiting class on Wednesday, Feb 5. The BYU Cougars announced the signing of 34 prospects on National Signing Day. These 34 new Cougars join the 13 who previously signed during the early signing period in December.

“arxAA for this class, their families and all of the hard work they have put in to be here,” Sitake said in a press release sent out by BYU athletics. “This class has a lot of guys who can contribute and will be more ready to play than ever before.”

New signee profiles

American Fork, Utah native Brade Schleimer is a three-star WR from American Fork High School. The 6-foot-4, 215-pound linebacker was the No. 6 ranked prospect in the state of Utah. Schleimer was named on the 2019 Deseret News All-State First Team and was recruited heavily by UCLA in addition to Utah, Nebraska and Utah State.

Syracuse, Utah native Ty Burke signed with BYU as a two-star defensive back from Syracuse High School. This 6-foot-1, 175-pound recruit was a two-time All-Region and All-Area award recipient. Burke was also recruited by Weber State and Southern Utah.

Fort Dix, New Jersey native Pete Tuguitugui comes in as three-star OL from National Football High School. The 6-foot-5, 230-pound offensive lineman had 15 total tackles and seven tackles for loss as a three star recruit. Tuguitugui also received interest from Michigan, North Carolina and Princeton. Burke said he would love to play under his brother, Hank Tuguitugui, on the BYU football team.

San Clemente, California native Preston Bos is a three-star DB from San Clemente High School. The 6-foot, 175-pound defensive back was a two-star athlete and one of the top defensive backs in the state of California. Bos is the son of current BYU defensive coordinator Ed Lamb. Bos was a two-star defensive back and was also recruited by Utah, Stanford, USC and Utah State.

Rise, shine and find your next apartment in the 2020 Housing Guide

What’s next for the No. 1 collegiate golfer Peter Kuest

BYU men’s golfer Peter Kuest has a lot on his mind as he looks to finish his senior season strong and start his professional career.

Kuest is currently the No. 1 collegiate golfer in the nation according to this year’s NCAA rankings. There seems to be no limit to his success as he has already placed first in three of six tournaments he has played at BYU in his senior year.

“He’s a coach’s dream. He does everything you need him to do. He’s in the right place. He sets a standard for his teammates,” BYU Men’s Golf Coach Bruce Brockbank said.

Brockbank has been very impressed with Kuest and the leadership and talent he brings to the team. Kuest has a special talent and big plans this season and Brockbank is excited to see how the options.

When asked about Kuest’s special golf ability, Brockbank said that he just takes a front row seat and enjoys every minute of it.

Kuest has started off hot but still hasn’t achieved his ultimate goal for his senior season. “I want a national championship.”

Kuest has achieved a lot while golfing at BYU with five top-10 finishes in six tournaments including the Pac-12 Conference Championship where he finished second. He has also been able to achieve something that national championship, then will hopefully be on his mind and in his goals this season.

Kuest entered BYU golf program during his freshman year, something he felt he always had been doing but has improved greatly.

“My overall work ethic. It’s hard to say my work ethic,” said Kuest.

Kuest has achieved a lot better than he ever imagined when he started pursuing golf when he was fifteen years-old that he always had been doing but has improved greatly.

“I’ve always worked hard, but I’ve started working a lot harder. In every area of my game that I’ve needed to improve, I just focus on how I can improve myself.”

Kuest said.

Kuest believes the best way athletes can improve their game is by focusing on their personal athletic goals. He said it is easy to get distracted by the way other people play but that it is better to work on personal skills.

Brockbank has been coach- ing Kuest at BYU since his freshman season. Even though he loves coaching and critiquing the players to help them improve, he joked say- ing that it is best to let Kuest focus on what he needs to do improve and just stay out of his way.

“He is a winner,” Brockbank said.

By MITCHEL PHIPPS
I know, but the price was excellent, and it has a GREAT RELIABILITY RECORD.

I don't even know! Can't conversation. I'm in right now.

The extended warranty is second to none.

That means you and the job. Because you did not order another upgrade.

What's the tool now?

If you don't need the bottom line, you can buy it. But I think it's a great deal.

I can't tell you exactly how much. I could tell you exactly how much, but the extended warranty is second to none.

There's no return on that. I'm going to fly back to Chicago. Check the calendar. It must be April. That's only.

WHERE'S THE WOOD?

WHERE'S THE PINE?

WHERE'S THE CHERRY?

WHERE'S THE MAPLE?
The bill hasn’t gotten a hear- ing yet, and if it passes, it’s unclear whether it would be constitutional. Romney’s key role in saving the troubled 2002 Olympics in Salt Lake City paired with his status as the first major-party presidential candidate from the Church has made him well- known and liked in the state where he moved after he failed 2012 presidential run. Many Utah voters share Romney’s wariness about Trump. A nationwide Associ- ated Press Survey of midterm voters in 2019 found that while two-thirds of church members voted Republican, just over half approved of Trump’s job performance. The VoteCast survey also found that 46% of Utah voters wanted to see the senator conflict the president. Shelly Cliff, a 13-year-old stay-at-home mother in subur- ban Riverton, is a Republican who’s never been a fan of Trump. She was pleasantly sur- prised at Romney’s stance. “I was greatly impressed by his integrity, his willingness to put the good of the country above his own,” Cliff said. Still, she knows that not all her neighbors feel the same, including several who didn’t vote for him in 2012 but have since come around. “I’ve been taken aback by how many people have been supportive,” she said. Though there’s no provi- sion for a recall, an overall sitting senator, one state law- maker has recently introduced a bill that would create one.

Man tears down banner supporting LGBT youth

Since then Brenda said she’s received positive affirmations from strangers. “We’ve all seen three people stop by and say, ‘Thank you’, that their kids got to walk by and see this. Somebody else supports them,” she said. “They reassure us that we’re doing the right thing.”

In June 2019, she hung a pride flag in her yard to cele- brate pride month. During that month, her flag was stolen five times. “I’m just to the point where I’m not going to be desecrated,” Brenda said when describing the experience. Her family would later take the flag down in the garage, dirty and cut up. “They continued to plant the flag in their yard,” Brenda said. “They are concerned about their family’s safety.” It’s a very safe neighborhood,” she said. “You could leave your door unlocked.”

They previously had a single motion-activated security camera on their doorbell, but after their flag was stolen the second time, they invested in a new security system that could record their entire lawn 24/7. “I would like to start seeing more banners like this around our school,” she said. But when she offered flags to her neighbors, none joined her. She even offered to help them plant flags in their yards. “We had no neighbors call,” she said.

Encircle has shown support for Brenda. They began a fun- fundraiser to buy billboards in the area displaying the same phrase that was on her banner. “Nodies, only live.” According to Encircle CEO Jacob Dunford, they’ve already raised over 60% of the needed funds, with the rest of donations from about 175 people. This way, according to the company, the banner “cannot be broken.”

Brenda said she has no idea what will happen to the perpetrator or who was behind her banner. “I want him to learn what love is,” she said.
